DETAILED ACTION***Election/Restrictions***

1. Applicant's election with traverse filed 11/12/2004 is acknowledged. The traversal is on the ground(s) that the Examiner has not explained the inventions having a separate status in the art. The Examiner respectively disagrees. As shown in the restriction requirement, Invention I and II do have two different matters. Invention I drawn to an apparatus and a method of a multifunction antenna with a PCB having the antenna elements on each side of the PCB as depicted in Figs. 15-16. Differently, Invention II drawn to a method for fabricating a multifunction antenna with two PCBs coupled together with antenna elements on each PCB as depicted in Figs. 18-19. In other words, the inventions are clearly distinct to each other due to limitations of "a second PCB coupled to the first PCB" and "at least one antenna element on the second PCB" appeared in independent 19 of invention II are not cited in any claims of Invention I. Therefore, the requirement is still deemed proper and is therefore made FINAL. Accordingly, non-elected claims 19-20 have been withdrawn from a consideration. It is advised that the cancellation of non-elected claims 19-20 by the Applicant is required.

Claim Objections

2. Claim 11-14 are objected to because of the following informalities:

In claim 11, lines 4-5, "in the first side of the printed elements in the first side of the printed circuit board" should be changed to --on the first side of the printed circuit board--.

In claim 11, line 6, "in the second side" should be changed to --on the second side--.

In claim 11, line 8, "in the first side" should be changed to --on the first side--.

In claim 11, line 10, "the first and second side" should be changed to --the first and second sides--.

In claim 12, lines 1-2, "a plurality of antenna element" should be changed to --the plurality of antenna elements--.

In claim 13, lines 1-2, "a plurality of antenna element" should be changed to --the plurality of antenna elements--.

In claim 14, lines 1-2, "a plurality of antenna element" should be changed to --the plurality of antenna elements--.

Appropriate correction is required.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-10 and 11-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 15-25 and 1-10, respectively, of U.S. Patent No. 6,664,932. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed

limitations recited in claims 1-18 of the instant application is obviously included in claims 15-25 and 1-10, respectively, of the U.S Patent No. 6,664,932.
